Cookies Policy

What are cookies?
In order to make sure our site is working properly, we may sometimes put a small piece of data known as cookie on your computer or mobile device. A cookie is a text file that is stored by a web server on a computer or a mobile device. The content of a cookie can only be retrieved or read by the cookie server. Text in a cookie often consists of identifiers, site names and some numbers and characters. Cookies are unique to browsers or mobile apps you use, and allow sites to store data, such as your preferences.

Which categories of cookies are used at Digea.gr?

Categories of cookies	Description	Acceptance
Strictly Necessary	These cookies are necessary in order to visit our site. These cookies do not recognize your individual identity. Without these cookies, we cannot provide our site efficiently. Under the law, your action to accept them is not required.	Necessary
Performance	They are used for monitoring performance. We use cookies to collect information about the use of our site by visitors, aiming at meeting more visitors' needs and improving the content of our site as well as facilitating our site.	Optional

The acceptance of all cookies is not necessary for the operation of the site, but through them you will experience better browsing. You can delete or block access to these cookies, but if you do certain site's features may not work well.

Data Controller for the cookies is Digea.

The cookie-related information is not used to personally identify you and we have the absolute control of the data. Cookies are not used for purposes other than those described in this document.

You can control and / or delete cookies according to your wishes. You can delete all cookies already installed on your computer, as well as set up most browsers in a way that prevent cookies from being installed. However, in this case, you may need to customize certain preferences yourself.

Cookies used in Digea.gr are:

Name of cookie	Description	Lifetime	Category	Recipients
_ga	*This cookie is used to distinguish unique users by assigning a randomly generated number as a client identifier. It is included in each page request in a site and used to calculate visitor, session and campaign data for the sites analytics reports.*	2 years	Performance	https://www.digea.gr/
_gat_UA-*	*This is a pattern type cookie set by Google Analytics, where the pattern element on the name contains the unique identity number of the account or website it relates to. It is a variation of the _gat cookie which is used to limit the amount of data recorded by Google on high traffic volume websites.*	1 minute	Performance	https://www.digea.gr/
__gid	*This cookie name is asssociated with Google Universal Analytics. It appears to store and update a unique value for each page visited.*	1 day	Performance	https://www.digea.gr/
PHPSESSID	*Cookie generated by applications based on the PHP language. This is a general purpose identifier used to maintain user session variables. It is normally a random generated number, how it is used can be specific to the site, but a good example is maintaining a logged-in status for a user between pages.*	End of Session	Strictly Necessary	https://www.digea.gr/
